

## WHY A COOPERATIVE FOR PARROTS ?

A cooperative is an organization that unites together individuals with common needs who; in order to satisfy them, join their force to manage an enterprise according to regulations governing coop activities.

Values and principles on which cooperatives are founded are as follows: pooling resources, democratic functioning, accountability, economic participation and independence. The cooperative is an organisation that allows its members to satisfy their needs according to conditions that suits their expectations.

The Quebec bird community presently faces a major parrot overpopulation problem. The birds will have no longer have places to live should something happen to their owner.

Of course, well-meaning people are devoted to taking care of parrots in search of a new owner. But these people are also vulnerable in the medium term. Parrots are therefore forced to move from a refuge to another.

The CO-ESP mission is to unite parrot owners who wish to create an adequate life sanctuary for parrots in Quebec.

Together, we can achieve greater things !
